

Update on Sterlite Copper Oxygen Plant – June 3, 2021

We are glad to share that our oxygen cylinder bottling plant has been commissioned, with an investment of INR 11 crores on the new facility. While our technology was so far focused on producing liquid oxygen, overseas technology providers have helped us implement processes to capture gaseous oxygen as well, which was so far being vented out as a byproduct.

Our employees and partners worked together to activate the facility within a day of receiving the required materials and machinery. The bottling plant has a daily production capacity of 400 medical-grade oxygen cylinders. We will continue putting in our best efforts to help meet the nation's needs.
