BALCO begins procedure to shut down its Aluminium Rolling Mill

• Falling global prices, high energy costs make operations unviable

• BALCO has sought permission from the Government of India to close the

unit by December 8, 2015.

The move will result in loss of around 1,000 direct and indirect jobs.

Raipur, Chhattisgarh, 14th September, 2015: Bharat Aluminium Company Limited

(BALCO), a subsidiary of Vedanta Limited has begun the official procedure to close down

its Sheet Rolling Division and Foundry at Korba, Chhattisgarh. The company has issued

the information to the Secretary, Labour Ministry, Government of Chhattisgarh as well as

the Bombay Stock Exchange (BSE) and National Stock Exchange (NSE).

BALCO has sought permission from the Government of India to close the unit by

December 8, 2015. The closure will be as per the provisions laid down in 'The Industrial

Disputes Act 1947'. The shutdown of the rolling division is also a part of a restructuring

exercise by BALCO. This move will result in loss of around 1,000 direct and indirect jobs.

Mr. Ramesh Nair, CEO, BALCO said, "The closure of the rolling mill is in the backdrop

of a crash in global aluminium prices and the prohibitive cost of coal to run our power

plants. Worldwide there has been a fall in energy cost but for BALCO the absence of

linkage coal and regulatory issue for starting our coal mines is making operations

economically unviable."

Although aluminium prices have plunged globally in the last few months, power costs are

rising in India, a contrarian trend making the cost of production increasingly unviable for

primary aluminium manufacturers. To operate at peak capacity, BALCO requires 30,000

mt of coal. While the coal auctions have benefitted the company in terms of allocation, the

new block will meet only 10% of the peak capacity.

Aluminium prices in the global market have fallen sharply from more than \$2,200 per tonne

at the beginning of 2015 to \$1,600 in the current month, making exports unviable. In India,

cheap aluminium from China and Middle-East has shrunk market share of domestic

aluminium producers who are already struggling with rise in input cost. A staggering 55%

of domestic aluminium consumption is met through imports, forcing domestic players to

operate at only 50% of their installed capacity.

Due to non-availability of bauxite and coal, the two basic raw material used in the

aluminium and power complex, BALCO is now sitting on idle capacity. The company's

current coal requirement of 15,000 MT to operate its power plants is being met partly by

auctioned coal and partly by imports.

vedanta

The Chotia Coal Mines which the company bagged in the recent auction is yet to be

operational due to pending Government clearances. The new 1,200 MW Power Project,

which was given clearance recently, is also struggling due to paucity of coal. On

Aluminium front lack of local bauxite and dependency on imported costly raw material is

making the company's produce non-competitive in the market.

About Vedanta Limited (Formerly Sesa Sterlite Ltd. /Sesa Goa Ltd.)

Vedanta Limited (Vedanta Ltd) is a diversified natural resources company, whose business primarily involves exploring and processing minerals and oil & gas. The Company produces oil & gas, zinc, lead, silver, copper, iron ore, aluminium and commercial power and has a presence across India, South Africa,

Namibia, Ireland, Australia, Liberia and Sri Lanka.

Vedanta Ltd, formerly Sesa Sterlite Ltd. /Sesa Goa Ltd., is the Indian subsidiary of Vedanta Resources Plc, a London-listed company. Sustainable Development is at the core of Vedanta's strategy, with a strong focus on health, safety and environment and on enhancing the lives of local communities. Vedanta Ltd is listed on the Bombay Stock Exchange and the National Stock Exchange in India and has ADRs listed on the New York Stock Exchange.
