Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses, deferred tax assets are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

Current and deferred tax relating to items directly recognised in reserves are recognised in reserves and not in the Statement of Profit and Loss.

(r) Impairment of assets

The carrying amount of assets/ cash generating units is reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. An asset is treated as impaired when the carrying amount of assets exceeds its recoverable value. The recoverable amount is greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value on an appropriate discounting factor. An impairment loss is recognised in the Statement of Profit and Loss where the carrying amount of an asset exceeds its recoverable amount. The impairment loss recognised in prior accounting periods is reversed if there has been a change in the estimate of recoverable amount.

(s) Provisions, contingent liabilities and contingent assets

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognised but are disclosed in the financial statements. Contingent assets are neither recognised nor disclosed in the financial statements.
